

This is an example of PDF actions and JavaScript.

When you open this page, a message box will pop up. This is the effect of the following page level JavaScript, which is triggered by the **Open Page** action:

```
app.alert("Welcome to CenoPDF!", 3);
```

This is an example of **Link** annotation: click it to go to <http://www.google.com>

Click this button to go to next page:
